Dear Students,

For assignment 4 Q3 part (a) please visit page # 268 and 269, of Lecture # 36 there is an example you have to do your Question as it is and in condition 2 where confidence interval is 98% so put out the confidence limit as,

$$98/100 = 0.98$$

$$\alpha = 1 - 0.98$$

$$= 0.01$$

Now put this interval in same question that is given and evaluate answer @please khud ker liyeay I cant do it every thing is given in handout for this Question. I am telling you guys again For assignment 4 Q3 part (a) please visit page # 268 and 269 of Lecture # 36
