

Assignment No. 01
Semester: Spring 2012
CS504: Software Engineering-I

Solution No-1:-

Business Requirements

There is a need for an online Business Decision making system / Adviser to effectively spot the right business areas for better financial investment by the interested investors based upon their financial history. The system should be able to provide assistance to the organization's consultants in making better predictions about their clients' investments. System should keep full track of clients' details regarding investments and liabilities, and offer an effective communication channel to interact with the clients via emails.

User Requirements

- 1 Log into the system
- 2 Customizable theme and profiling
- 3 Home page of Adviser / user showing configurable switch board
- 4 Manage e-mail groups.
- 5 Send custom emails to individuals / groups
- 6 Send template driven emails to individuals / groups
- 7 Add client liabilities along with Repayment schedule and Drawdown schedule
- 8 View existing Liabilities
- 9 Edit/delete client's Liabilities
- 10 Add client Investment
- 11 Apply commission / fee to Investment
- 12 View clients' Investments
- 13 Filter Investments by entities
- 14 Edit/Delete client's investment
- 15 Add investment for transaction
- 16 View and manage transaction list
- 17 Redeem transaction

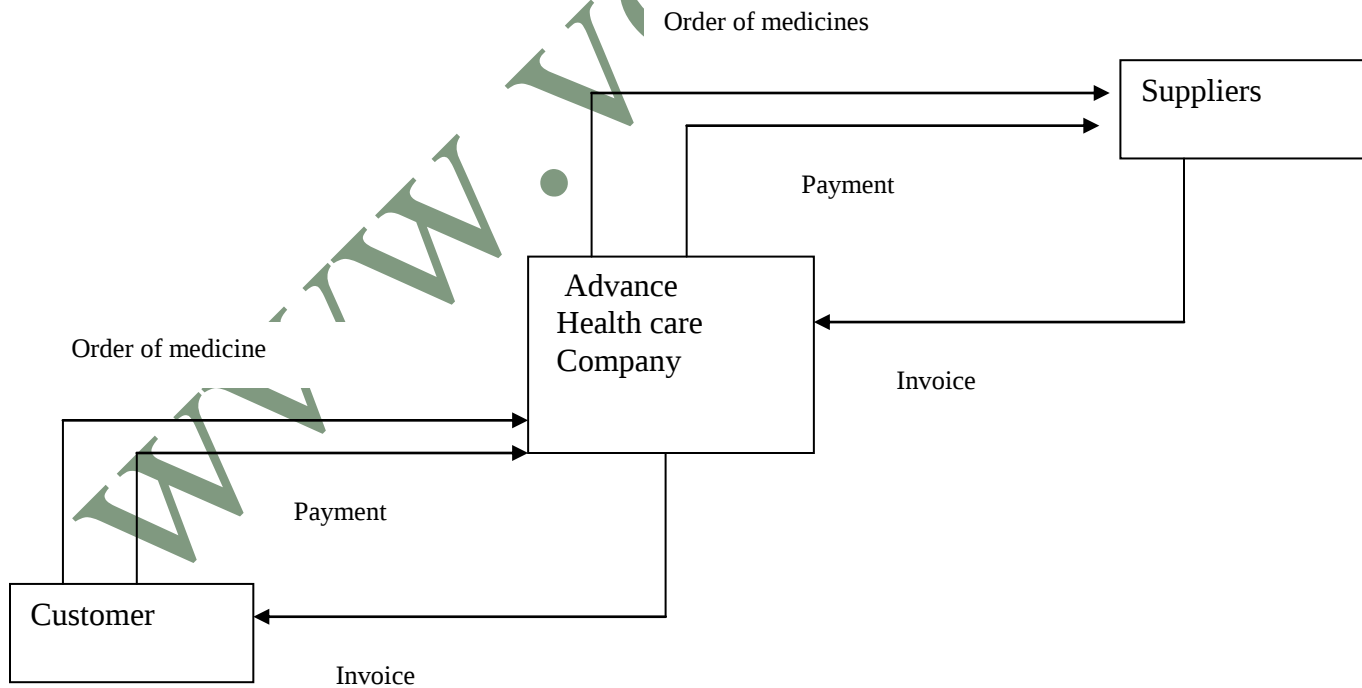

Functional Requirements

FR01: User Login

FR01-01	System shall allow user/adviser to login
FR01-02	System shall get Username from user
FR01-03	System shall get password from user
FR01-04	System shall authenticate user when he / she submits username and password on login button
FR01-05	System shall allow user to Reset his username and password when he / she clicks on the Reset button
FR01-06	System shall allow user to remember his username and password by entering into the checkbox.

Solution No-2:-

Context diagram for HealthCare Sale Management System
