Question # 2 Answer:

I can upload my web page by succeeding these phases:

1. I will open this URL WordPress.com — [Get a Free Blog Here](#) in my internet browser.
2. First I will click on Get Started Here Then I will sign up and I will provide my full details like my Username, password, email address e.g. I need to fill all the empty fields in the page.
3. In next step I will click on Create Blog.
4. Now, an e-mail has been sent to my email account. First I have to activate my account. Therefore, I will open my inbox & I will click on the particular hyperlink in the email message to activate my account.
5. Now I have to describe about myself. Next, I have to click on Save Profile.
6. In this phase I will open this URL WordPress.com > [Log In](#) Afterward I will Login using my username and password which was generated for me.
7. At that time I will click on Post. Then on Add New.
8. A fresh page will appear on my display screen; at this time I will provide the information which is necessary. I will click on HTML. Now I will copy my web page complete HTML code & text which I created earlier then I will paste it in the empty field.
9. Moreover WordPress.com — [Get a Free Blog Here](#) gives us choice to write with HTML or without HTML which is known as VISUAL on the website. It offers both options VISUAL and HTML.
10. In next phase, I need to write the Title for my web page. When done with Title, at that point I will click on Publish.
11. Now my webpage is online to the world. Any one from anywhere in the globe can view my webpage.
12. Additionally, I can also upload my any information in the future. I had given an option to edit my previous posted information any time.
