

Question # 2 of 20 (Start time: 09:18:14 PM)

Total Marks: 1

Assume $Y = f(X)$, which of the following is TRUE if $d^2Y/dX^2 > 0$? Select correct option:☒ X is a minimum☐ X is a maximum☐ Y is a minimum☐ Y is a maximum

The quantity of a good or service that producers are willing and able to sell during a certain period of time is known as:

 Select correct option:☐ Demand☒ Supply☐ Market demand☐ Market supply [Click here to Save Answer & Move to Next Question](#)

Question # 4 of 20 (Start time: 09:20:41 PM)

Total Marks: 1

The concept of derivative is closely related to:

▶ Select correct option:

Total analysis

Average analysis

Marginal analysis

Regression analysis

The technique of conducting survey interviews is the part of which of the following forecasting analysis?

▶ Select correct option:

Qualitative forecasting

Quantitative forecasting

Regression analysis

Time series analysis

[Click here to Save Answer & Move to Next Question](#)

When quantity demanded is more than quantity supplied then which of the following will occur?

▶ Select correct option:

Shortage

Surplus

Inflation

Equilibrium

Question # 7 of 20 (Start time: 09:23:40 PM)

Total Marks: 1

Inputs that can be changed during the production process are known as ----- inputs.

▶ Select correct option:

Fixed

Variable

Good

Bad

Question # 8 of 20 (Start time: 09:24:03 PM)

Total Marks: 1

The questionnaires which include answers like Yes or No are called:

▶ Select correct option:

Open ended questionnaires

Closed questionnaires

Bad questionnaires

Good questionnaires

Direct demand is also known as:

▶ Select correct option:

Consumer's demand

Producer's demand

Market demand

Derived demand

Question # 10 of 20 (Start time: 09:25:12 PM)

Total Marks: 1

Which of the following is TRUE for the law of supply?

▶ Select correct option:

There is inverse relationship between the price of a

There is positive relationship between the price of a

There is positive relationship between the price of a

There is inverse relationship between income and q

Question # 11 of 20 (Start time: 09:26:16 PM)

Total Marks: 1

Root mean square error is normally used to check the validity of ----- forecasts.

▶ Select correct option:

Moving average

Time series

Seasonal

Ratio to trend

Question # 12 of 20 (Start time: 09:27:30 PM)

Total Marks: 1

Price elasticity of demand measures the:

▶ Select correct option:

Percentage change in quantity demanded given a p

Percentage change in quantity demanded given a p

Percentage change in quantity demanded of produc

Percentage change in quantity supplied given a per

Question # 13 of 20 (Start time: 09:28:17 PM)

Total Marks: 1

If we transform inputs into outputs of goods and services then this process is known as:

▶ Select correct option:

Production

Consumption

Regression

Correlation

Question # 14 of 20 (Start time: 09:29:05 PM)

Total Marks: 1

If inputs are perfect compliments, it means that Isoquants are:

▶ Select correct option:

Straight lines

L-shaped

Positively sloped

Negatively sloped

Question # 15 of 20 (Start time: 09:30:13 PM)

Total Marks: 1

Which of the following statements is TRUE?

▶ Select correct option:

Total cost = Marginal cost + Average cost

Total cost = Fixed costs + Variable costs

Total cost = Marginal cost + Variable cost

Total cost = Fixed costs + Average costs

Question # 16 of 20 (Start time: 09:30:35 PM)

Total Marks: 1

Suppose $Y = f(X)$, if $Y = 5$ then what will be dY/dX according to rules of differentiation?

▶ Select correct option:

0

5

5X

5Y

Question # 17 of 20 (Start time: 09:30:54 PM)

Total Marks: 1

Which of the following is the assumption of regression analysis regarding error term?

▶ Select correct option:

Normal distribution

Zero mean

Constant variance

All of the given options

Question # 18 of 20 (Start time: 09:31:09 PM)

Total Marks: 1

Total revenue – Total cost shows:

▶ Select correct option:

Value of the firm

Future value of the firm

Cost of the firm

Total profit of the firm

Question # 19 of 20 (Start time: 09:31:44 PM)

Total Marks: 1

Managerial economics uses which of the following tools to estimate the decision models?

▶ Select correct option:

Mathematical economics only

Econometrics only

Mathematics and Statistics

Mathematical economics and econometrics

Question # 20 of 20 (Start time: 09:32:40 PM)

Total Marks: 1

$\ln Q = \ln A + a \ln K + b \ln L$. This is the logarithmic form of:

▶ Select correct option:

Investment function

Cobb Douglas production function

Simple production function

Regression function
